INSPECTION CERTIFICATE

No. 1930

STATE OF NEW YORK
Department of Farms and Markets
Division of Agriculture.

CERTIFICATE OF INSPECTION OF NURSERY STOCK

This is to Certify that the nursery stock of Harry L. Squires, of Good Ground, County of Suffolk, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests.

This certificate expires September 1, 1921.

Dated, Albany, N. Y., September 8, 1920.

GEORGE E. HOGUE,

Commissioner of Agriculture.

IMPORTANT BEFORE ORDERING READ THE FOLLOWING

HOW TO ORDER. Send orders early. Remember that delays are always liable to occur on account of a rush of orders, bad weather, scarcity of help, and other causes. Write plainly your name, post office, county and state, and also give your shipping address if it is different from your post office address. State whether stock is to be shipped by mail, express or freight. All orders will be promptly acknowledged.

PRICES in this catalogue abrogate all previous quotations. **THE PRICES QUOTED ARE FOR QUANTITIES SPECIFIED OF A SINGLE VARIETY, BUT SIX OF ANY VARIETY WILL BE SUPPLIED AT THE DOZEN RATE. 50 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 50 RATE; 100 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 100 RATE; 250 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 250 RATE; 500 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 500 RATE; AND 1,000 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE THOUSAND RATE.**

GUARANTEE. I warrant all stock to be true to name, with the explicit understanding that should any prove otherwise, I will refund the money paid, or replace it with other stock, but I am not liable for damages beyond this. I do not guarantee the crop, as too many conditions enter into the successful growing of any crop.

CLAIMS, if any, must be made immediately upon receipt of goods, when they will be carefully and cheerfully examined and, if just, all made satisfactory. Claims made after 5 days from receipt of goods will not be entertained.

TERMS OF PAYMENT. Invariably, cash in advance. Money may be sent by whatever method is most convenient.

PREPAID PRICES. As most people prefer to have plants shipped prepaid, so they will know what the total cost will be, I have quoted prepaid prices on nearly everything listed. At these prices, plants will be shipped prepaid to any part of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, District of Columbia, Delaware, Virginia and West Virginia. Plants will be shipped at my option, by mail or express, whichever is least expensive, but when requested to do so, I will ship by mail 300 strawberry plants, 500 vegetable plants, 100 asparagus roots, 100 raspberry and similar lots of other plants of about the same size. If you want large lots of plants sent by mail or if you live in a state not named above and want your plants sent by mail, you can order at the "Not Prepaid" prices, and I will send them by mail C. O. D. for the amount of postage, and you can thus pay the postage when you receive the plants. If you want plants shipped this way, please specify in your order, "By mail C. O. D. for the postage." If, through error, an express shipment reaches you not prepaid, when you have ordered at prepaid prices, notify me at once, sending the express receipt, and I will send you the amount you have to pay for express charges.

SHIPPING. ALL STOCK IS SHIPPED AT PURCHASERS' RISK. It will be carefully packed and delivered to forwarders in good condition, but after that it is beyond my control and my responsibility ceases.

SHIPPING POINTS. You will notice that stock is shipped from several different shipping points, and your order may be filled in more than one shipment. By ordering at the prepaid prices, all uncertainty as to transportation charges will be avoided, as you will have none to pay when the stock arrives. I advise you to order at the prepaid prices, for in many cases the amount I have added to cover transportation charges is much less than the actual cost will be.

PACKING. All shipments will be carefully packed and packages will be as light as is consistent with good packing. No charge made for boxing and packing.

SUBSTITUTION. It is my custom, should the supply of any variety become exhausted (which will sometimes occur), to substitute a similar variety. When it is desired that I shall not do this it must be so stated in the order. To simply affix the words "No substitution" is all that is necessary.

LARGE ORDERS. Special prices will be quoted on large orders.

BERRY PLANTS IN THE SUMMER AND FALL. Runner strawberry plants may be very successfully planted the last of August and during the fall months, and large number of them are planted at that time. Pot-grown strawberry plants may be successfully planted any time during the spring, summer and fall. The main crop of pot-grown strawberry plants is usually ready about the middle of August, but this year, for the first time, I expect to be able to supply them from early spring until late in the fall. Raspberries, blackberries, dewberries, gooseberries, currants, grapes, etc., may be planted late in the fall, during October and November.

LARGE ASPARAGUS AND RHUBARB ROOTS FOR QUICK RESULTS. Please notice the large sizes of asparagus and rhubarb roots listed. The large rhubarb roots will produce a crop this season. Asparagus should not be cropped until one year after planting. The larger roots you plant this year, the larger and more abundant will be the shoots next year. Asparagus and rhubarb may be easily grown during the winter by forcing the large roots in cellars and green houses.

VARIETIES NOT LISTED. Should you need any kind or variety of plants not listed in this catalogue, I can probably get it for you, and shall be pleased to quote you prices.

REFERENCE. Center Moriches Bank, Center Moriches, N. Y.

Strawberry Culture

The ground should be prepared the same as for other crops by plowing deeply and thoroughly pulverizing the surface. Almost any kind of fertilizer may be used, but stable manure and finely ground bone meal are among the best. The rows should be from three to four feet apart and the plants should be set from 12 to 18 inches apart in the row. Dip the plants in water before planting, and place them only as deeply in the soil as they stood before they were dug. Press the earth firmly about the roots. Cultivate and hoe them often. If possible, in late autumn, cover the strawberry bed with a mulch of salt-meadow hay, or stable manure, to a depth of about two inches. If set in rows three feet apart with the plants one foot apart in the row, an acre will require 14,520 plants. If set in rows three and a half feet apart with plants fifteen inches apart in the row, an acre will require 9,963 plants.

It is best to plant early, medium and late varieties, so as to have a long fruiting season, and by planting some of the Everbearing variety, you can have berries all during the summer and fall.

All varieties listed have perfect flowers and do not need the association of any other variety in order to be fruitful.

STRAWBERRY PLANTS

Brandywine

Aroma. Very late. This is probably the latest and is certainly one of the very best varieties grown. It produces a very large crop of big fancy berries of the best quality. One of the best shipping varieties.

Brandywine. Medium late. Very vigorous and productive. Berries very large; dark red.

Campbell's Early. Very early. A strong grower and very productive of large bright red berries of very high quality.

Chesapeake. Late. Nearly as late as Gandy, larger and just as firm, much more productive and without green tips. One of the fanciest varieties grown.

Climax. Early. A very heavy yielder of very large firm berries.

Corsican. Same as Ryckman.

Early Ozark. Very early. Large and enormously productive.

Early Jersey Giant. Early. Large. One of the best early berries.

Gandy. Very late. Large and firm.

Steven Late Champlon

Glen Mary. Mid-season. A heavy yield-
er of large fancy berries.

Joe Johnson or Big Joe. Late, ripen-
ing at the same time as the Chesapeake. Very large and wonderfully
productive. In flavor it is one of the
best; firm and a good shipper. Suc-
ceeds upon almost all soils and un-
der all conditions.

Klondike. Medium early. Very pro-
ductive. Berries large and firm.

Kellogg's Premier. Very early. The best
and most popular early strawberry.
It is a vigorous grower and very pro-
ductive. Berries are very large and
bright red to the center. It is delici-
ous in flavor and a splendid shipper.
It has an unusually long fruiting sea-
son.

Marshall. Mid-season. One of the larg-
est and most popular varieties. Ex-
tra good flavor.

New York. Same as Ryckman.

Nick Ohmer. Mid-season to late. Very
large and fancy.

Norwood. Mid season. Large and fancy.
Claimed by the originator to have pro-
duced four berries to the quart.

Ryckman. Medium early. Berries are
of the largest size, and unexcelled in
sweetness and flavor. It is of very
vigorous growth and bears tremend-
ous crops of strictly fancy fruit. It
grows well on poor soils and is not-
ed for producing good crops on the

same ground for several years in
succession. Sells for the highest
prices on market. One of the most
profitable and popular strawberries
in existence.

Senator Dunlap. Early to mid-season.
One of the most profitable varieties.
An extra strong grower and very pro-
ductive. Berries dark red. Medium
large.

Stevens Late Champion. Late, large
and fancy. Will produce twice as
many berries as Gandy.

Stevens Late Champion

Senator Dunlap

Success. Medium early. One of the very
best early varieties for home garden
and nearby market, but not for long
distance shipping. Berries are very
large, bright scarlet and of delicious
flavor. A vigorous grower and very
productive.

William Belt. Mid-season. Considered
by many to be the best flavored straw-
berry grown. It is certainly one of
the most popular and one of the most
extensively grown varieties. Berries
are very large and deep crimson in
color. It begins to ripen quite early
and continues until almost the close
of the season; the last berries being
large, handsome and full flavored.

Fall Bearing or Everbearing Strawberry Plants

Everbearing strawberries are now extensively grown both for home use and
for market. They bear steadily from early June until November. They have the
finest flavor and sell readily at very high prices. The best variety is the **Progres-**
sive.

PROGRESSIVE. Medium size. A vigorous grower and very productive. They
bear fruit the same season they are planted. From 100 to 150 ripe berries,
green berries and blossoms are often found at a time on a single plant. It has
a rich wild strawberry flavor.

Pot-Grown Strawberry Plants

FOR SPRING, SUMMER AND FALL PLANTING

These are large, heavily rooted plants and are shipped with earth on the roots, just as they grow in the pots. They will reach you in a good growing condition and can be safely transplanted at any time, even in the hottest and driest weather, without any serious check to their growth. They will produce a good crop of the largest and finest berries next summer. While the first cost of pot-grown plants is somewhat greater than that of ordinary or runner plants, the advantages to be gained by planting the pot-grown are so great and many, there can be no comparison in value between them. I can supply pot-grown strawberry plants from about April 1st until the ground freezes in the fall.

Runner Strawberry Plants

For September, October and November Planting

These are strong, well-rooted young plants grown from beds planted this season. They will be properly rooted and ready for transplanting about September 1 unless the weather should be very dry. The earliest of these plants will be shipped from Maryland and are extra good ones, being larger and better rooted at this time of year than plants grown in this latitude. There is a rapidly increasing demand for strawberry plants in September, and during the fall, and I usually sell more plants at that time than during the spring.

Berry Baskets

I can supply quart and pint berry baskets, in 1,000 lots, shipped from the factory in Western New York. Ask for prices.

Dickerson Ctr., N. Y.

Mr. Harry L. Squires, Good Ground, N. Y.
Dear Sir: Received strawberry plants promptly and in good condition. Thanking you for good measure and good quality. I remain,

Sincerely yours,
Lawrence Raymo.

Lock Box 273, New London, Conn.

Mr. Harry L. Squires, Good Ground, N. Y.
Dear Sir: Plants arrived in first class condition.—very nice looking ones. Thanking you for your prompt shipment, I remain,

Yours truly,
P. W. Noyes.

RASPBERRY PLANTS

Columbia. (Purple.) One of the most delicious and popular raspberries grown.

Cumberland. (Black). Mid-season. One of the very largest raspberries.

Cuthbert. (Red.) Mid-season. Large, firm and of good flavor. Very productive.

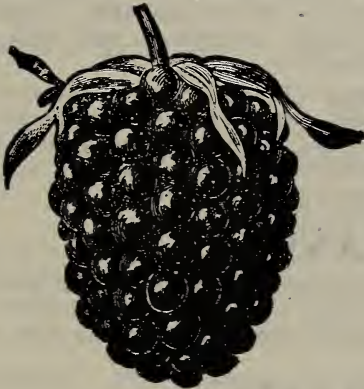

St. Regis Everbearing. (Red.) The most valuable raspberry grown. It is very early,—in advance of all other red varieties, and bears an immense crop during the regular raspberry season. In August, it begins to bear another crop which lasts until cold weather.

Cuthbert

Berries are bright crimson, large, rich, sugary, with full raspberry flavor; firm and a good shipper. It is a vigorous grower and very hardy. Begins bearing the same season it is planted.

BLACKBERRY PLANTS

Eldorado

Blowers. Mid-season. Very large and of superb quality. Enormously productive and very hardy. Has a long fruiting season.

Eldorado. Mid-season. Generally considered to be the best blackberry grown, both for home use and market. Berries are large, jet black and are especially noted for their sweetness and delicious flavor. It has never been known to winter kill, even in Northern Michigan and Wisconsin.

Snyder. Very early. Berries medium sized, very sweet and of delightful flavor. Hardy. Very popular on account of its high quality and early ripening.

DEWBERRIES

The Most Profitable Fruit Grown.

Dewberries are bringing big money and are said to be more profitable than any other fruit grown at the present time. Berries are very large, beautiful and of delicious flavor. They are earlier and larger than blackberries. Of slender trailing growth, and immensely productive. They should be planted about three feet apart. Most growers use short posts and a single wire on which the vines grow. **LUCRETIA.** The leading variety. Much larger and incomparably better than any blackberry. Brightest glossy black.

388 Central Ave., Hawthorne, N. J.
Mr. Harry L. Squires, Good Ground, N. Y.
My Dear Sir: I am writing to inform you that I am extremely well pleased with the condition of the 100 Barberry hedge plants that you sent me recently. With all the trouble of shipment, they arrived in A-1 condition and are beautiful specimens. Kindly send me your fall catalogue and I will order some plants, etc., for fall planting.

Yours very truly,
Paul B. Ordway.

9 Martha Terrace, Floral Park, N. Y.
Dear Mr. Squires,

Received the grape vines and honeysuckle today. Accept my thanks for the prompt and square way you do business. It is appreciated, I assure you. If you will send me your fall catalogue, I have no doubt I can find something I want,—probably several things,—but some that I will buy and can use now.

Yours truly,
R. L. LeGrand.

GRAPE VINES

Concord.

Catawba. (Red.) Late. The best red grape. Vigorous, hardy and productive. The bunch and berries are large; the flesh is juicy, pulpy and possesses a delightful sugary flavor. It is the last to ripen and the best keeper, lasting until March or later.

Concord. (Black.) Mid-season. The best black grape. Cluster and berry very large. It has an exquisite flavor, is firm, keeps well and good shipper.

Delaware. (Red.) One of the very best for table use. Bunch and berries of medium size. The flavor is very sweet and delicious.

Diamond. (White.) Vine is hardy and very productive; bunch large and compact; berries large; flesh juicy and melting; flavor sweet and spicy.

Niagara. (White.) The standard white grape. Both bunch and berries are very large; flesh firm and juicy; flavor is of the very best, and does not resemble any other sort. The vine is hardly, vigorous, and extremely productive.

Worden. (Black.) One of the very best black varieties. Bunch large and compact; berries very large; flavor delightfully sweet. Makes excellent grape-juice or sherbert.

CURRENT PLANTS

Wilder. (Red.) The best red currant. Berries large and juicy; flavor mild and spicy. It is a vigorous grower, has a long fruiting season, and keeps well.

White Grape. (White.) The best white currant. Clusters are long; berries large; flavor mild and delicious.

GOOSEBERRY PLANTS

Downing. (White.) Considered the best gooseberry. The fruit is large; flesh soft, juicy and tender; flavor just barely sour; quality good. Equally valuable for table use or market.

Houghton. (Red.) One of the old favorites. The berries, while medium in size, are of very fine quality and highly flavored.

VEGETABLE PLANTS

From early spring till fall, I can supply, in large or small lots, leading varieties of Cabbage, Cauliflower, Brussels Sprouts, Tomato, Sweet Potato, Beet, Celery, Egg, Pepper, Kohl-Rabi, Leek, Lettuce, Kale, Onion, Parsley and several other kinds of vegetable plants. These plants are packed so they can be shipped safely for long distances, either by mail or express. Each year, I ship them to nearly every state in the Union. Mail shipment is more satisfactory than express.

Ripe and Green Tomatoes

Fresh ripe tomatoes, \$2.00 per bushel. Best varieties. Green tomatoes for pickling, same price. Can usually begin shipping about August 15th.

Ripe and Green Peppers

Chinese Giant and Ruby King. Green peppers ready in August. Ripe peppers ready a little later. These are both sweet varieties. 75c per peck; \$2.00 per bushel. These may be sent by mail C. O. D. for the postage.

Asparagus Roots

Asparagus Culture. Asparagus is one of the most delicious and profitable crops grown, and its culture is very simple. Set plants from one to two feet apart in rows three feet apart. Plant five inches below surface. Cover with two inches of earth, filling in balance to a level later in summer. Asparagus may also be forced in the cellar during winter by planting large roots. Leaflet on "Growing Asparagus and Rhubarb in the Cellar during winter" will be sent free to each customer buying roots.

Palmetto. Stalks of large size, attractive, rich and tender. Free from rust or blight. Yields a heavy crop at an early age. More extensively grown than any other variety.

Argenteuil. Very similar to Palmetto.

Rhubarb Roots

Rhubarb Culture. Plant in rows four feet apart with plants two feet apart in row, and the crown one inch below surface. May be planted any time during the spring, summer or fall. By planting roots of forcing size, it may be easily grown in the cellar during winter.

Myatt's Linnaeus. Early, productive, large and tender. Requires less sugar than other sorts.

Horseradish Roots

Horseradish Culture. Plant roots in rich soil, small end down, with top an inch below surface.

English or Common. The variety in general use.

Hop Plants

A very productive variety. Easily grown.

Chives Plants

Highly prized by many for soups and seasoning. A hardy perennial. Can be cut many times during the season.

Mint Plants

SPEARMINT. The variety that produces the mint of the markets and largely used for culinary purposes.

Sage Plants

A well known plant, the leaves of which are much used for seasoning.

Thyme Plants

Another well known plant, the leaves of which are used for seasoning.

Witloof Chickory (French Endive) Roots

These roots produce a delicious and very popular winter salad. They can be forced in early spring, or by planting in the cellar, during winter, the same as asparagus and rhubarb.

Canajoharie, N. Y.

Mr. Harry L. Squires, Good Ground, N. Y.

Dear Sir: The strawberry plants arrived in first class condition and are fine. Thanks for your prompt shipment.

Very truly,

Emory C. Walrath

Mr. Harry L. Squires, Good Ground, N. Y.

Dear Sir: I received the basket of plants in fine shape,—and so many more than I ordered. You certainly are very generous. Thanking you, I am,

Very truly,

Mrs. C. Skinner.

Prince Camille de Rohan

ROSES

CLIMBING ROSES

Crimson Rambler. Most popular out-of-door climber. A rapid producer of long heavy canes, reaching a height of ten to twenty feet in one season. Rich clusters of bloom form a mass of vivid crimson beauty until late in the season. Perfectly hardy.

Dorothy Perkins. Similar to Crimson Rambler except in color which is a clear shell pink.

Climbing American Beauty. Rich red, passing to crimson. Same as American Beauty in size, color and fragrance, with the addition of the climbing habit. Hardy and a wonderfully free bloomer.

Tausendschon or Thousand Beauties. A very beautiful climbing rose. It is a very strong grower, and from early June until well into July, it is literally covered with clusters of decorative semi-double flowers of varied shades of deep to light pink and white. Its bloom is produced in such profusion as to almost cover the handsome pale-green foliage.

HYBRID PERPETUAL ROSES

Anna de Diesbach. Lovely shell pink; long pointed buds, very large petals, and large, finely formed, compact flowers, very full and double; sweetly fragrant. Vigorous grower and bloomer.

Coquette des Alpes. Large, full and well formed, with very large petals;

pure white; fragrant; profuse bloomer; hardy.

Frau Karl Druschki or White American Beauty. Large snow-white blooms and long slender buds. Hardy and a vigorous grower.

General Jacqueminot. The famous "Jack" rose. Bright scarlet-crimson. Large, rich, brilliant, velvety and fragrant.

Gruss an Teplitz. Hardy in all sections and a vigorous grower. Vivid, dazzling, fiery crimson; sweetly fragrant; produces a mass of gorgeous blooms on long stems.

Madame Plantier. Pure white, large and double; hardy as a forest tree; a free and continuous bloomer. Very popular.

Marshall P. Wilder. Deep, rich cherry-carmine; extra large and full; a very strong grower and free bloomer.

Paul Neyron. Clear cherry-rose. The largest of all roses; very double and full; finely scented; blooms first season and all summer. Grows to a great height in a single season.

Prince Camille de Rohan. Universally known as "The Black Rose," owing to its very deep, velvety crimson color, passing to intense maroon, and shaded black; large, handsome and fragrant blooms.

Ulrich Brunner. Brilliant cherry-red flowers of immense size.

ORNAMENTAL SHRUBS

Althea or Rose of Sharon

Althea or Rose of Sharon. Flowers are of good size, trim and attractive; blooms in September and October. Pink, purple, red, white.

Calycanthus or Sweet Scented Shrub. Its foliage is rich; flowers of a rare chocolate color, with an agreeable odor. Blooms in June and at intervals through the summer.

Butterfly Bush. A beautiful and very popular shrub. Matures rapidly and will make a handsome bush, the first season. It produces beautiful lilac-colored flowers in profusion, and blossoms the entire summer.

Deutzia, Pride of Rochester. Very large double white flowers. Very early. Excels other varieties in size of flower, profuse bloom and vigorous growth.

Deutzia, Candida. Pure white flowers, very double.

Forsythia or Golden Bell. A very early and showy spring bloomer; flowers bright yellow, appearing before the leaves. Very effective for covering steep slopes, walls, fences and arbors.

Honeysuckle, Tartarian Upright. A well known shrub of erect habit. Valuable for its handsome flowers and showy fruit. Delightfully fragrant; one spray will fill a room with its delicate perfume. Pink, red and white.

Hydrangea, P. G. One of the most popular hardy shrubs. The immense heads of bloom are cream-color in bud, pure white when fully expanded, changing to pink and bronze with age, and finally to brown when frosted.

Hydrangea, Arborescens Sterilis (Hill of Snow). Flowers are pure snow-white, and its panicles which are flat, often measure 12 inches across. Perfectly hardy and of the easiest culture.

Lilac, Purple. Bluish-purple flowers, standard variety.

Lilac, White. Cream colored flowers.

Snowball, Common. A very popular shrub producing its snowy-white sterile flowers in large balls in June.

Snowball, Japan. An erect, compact shrub, blooming in June; completely covered with large balls of flowers that are as white as snow; foliage is dark green.

Quince, Japan. Dark green foliage, and showy deep scarlet flowers of good size, produced singly or in masses along the branches.

Tamarix. A strong upright grower, with fine feathery foliage. Small pink flowers. Splendid shrub for seaside planting.

Syringa, Golden. A very pretty medium size shrub with golden-yellow foliage. It keeps its color the entire season.

Syringa, Common. Very hardy and vigorous, with large handsome foliage and beautiful white flowers produced in greatest profusion.

Spirea, Van Houttei. The finest of all the Spireas. In May and June, the bush is covered with white flowers, presenting a beautiful appearance.

Spirea, Anthony Waterer. A dwarf variety of great beauty. Its broad, flat heads of red flowers continue in perfection all summer.

Spirea, Aurea (Golden). Foliage green, bordered with rich golden yellow. In June, the branches are covered with double white flowers.

Spirea, Billardi. Rose colored flowers in spikes; blooms nearly all summer.

Weigela, Candida. A choice variety, blooming in great profusion during June and to some extent all summer. Pure white.

Weigela, Rosea. An elegant shrub, with fine rose-colored flowers; of erect compact growth; blossoms in June.

Weigela, Eva Rathke. Flowers brilliant crimson. A very attractive variety. Almost a continuous bloomer.

Weigela, Variegated. Of dwarf habit; finely variegated foliage which lasts the entire season; contrasts nicely with its rose-colored flowers.

ORNAMENTAL VINES

Ampelopsis Veitchii (Japan Ivy). A beautiful, hardy climbing plant of Japanese origin. It grows rapidly and clings with the tenacity of Ivy. The foliage is very handsome green in summer, changing to crimson in autumn. For covering brick and stone structures, walls, etc., no plant is so useful.

Clematis, Paniculata. Single, white. Of extremely rapid growth, with shining green foliage, and a profusion of flowers which are small but borne in large panicles.

Clematis, Jackmanii. Large, intense violet purple, and remarkable for its velvety richness; free in growth and abundant and successive bloomer.

Chinese Matrimony Vine. One of the hardiest of climbing vines. Purple flowers and later covered with scarlet berries.

Honeysuckle, Hall's Japan. A strong vigorous grower, almost evergreen, with pure white flowers, turning to yellow; very fragrant; covered with flowers from July to December.

Ivy, American, or Virginia Creeper. A fine rich green in summer, changing to crimson in Autumn. Affords shade quickly and is very desirable for covering walls, verandas, or trunks of trees.

Wistaria, Chinese Purple. One of the most elegant and rapid growing of all climbing plants. Vines grow 15 to 20 feet in a season and producing long, hanging clusters of pale blue flowers in spring and fall.

Wistaria, Chinese White. Same as above except that flowers are pure white.

HEDGE PLANTS

California Privet. A rapid and vigorous grower. It has handsome glossy, oval-shaped leaves which remain on well into the winter. Very popular for ornamental hedges and trimmed specimens.

Barberry Thunbergii. Dwarf growing; foliage, rich bright green which changes to a brilliant red color in autumn. Red berries also appear at that time. It is perfectly hardy, easily transplanted, and free from insects. Very ornamental and as attractive in winter as in summer.

FLOWER PLANTS

HARDY PERENNIALS OR "OLD FASHIONED" FLOWERS.

ALYSSUM. (Madwort)

Saxatile (Basket of Gold). 9 inches. Small, golden yellow flowers, covering the plants during May.

ANCHUSA.

Italica Dropmore (Heavenly Blue Flower). 4 feet. Flowers an inch or more across are freely produced in large branching heads during June and July. Deep azure or Gentian blue.

AQUILEGIA. (Columbine).

Long-Spurred Hybrids. 2 feet. The finest of the Columbines. The large flowers are of varied shades of blue, lavender, red and white. The flowers of each plant are different from all the others. Mixed colors.

BOCCONIA. (Plume Poppy)

Cordata (Japonica). 5 to 6 feet. A stately plant, with ornamental foliage, producing large terminal spikes of cream-colored flowers on stems.

CENTAUREA.

Montana (Perennial Corn Flower). 2 feet. Large, violet blue, fringe-like flowers during July, August and September.

CANTERBURY BELLS (Cup and Saucer).

An old favorite. 2 to 3 feet. Bloom incessantly through July and August, with a great profusion of lovely bell-shaped flowers, blue, white and rose. Mixed colors.

CAMPANULA (Harebell or Bellflower).

Persicaefolia (Peach-Leaved Harebell). 18 inches. Of erect habit, producing large, bright blue bell-shaped flowers, on slender, graceful stems. Flowers freely for a long time.

COREOPSIS.

Grandiflora. 2 to 3 feet. One of the best perennials. Used extensively for cut flowers, as it has long flower-stems, and lasts a long time. The large, showy, golden-yellow flowers are produced very freely from June to October.

DOUBLE DAISY OR BELLIS

Longfellow. The well known English Daisy. Blooms very early in spring. Extra large, double, dark rose.

SHASTA DAISY.

A fine, hardy perennial, 12 to 18 inches high. Flowers pure white, with bright yellow center, and about 4 inches in diameter. Valuable for cut flowers, as the stems are long, stiff and wiry; flowers remain fresh for two weeks or more after cutting.

DELPHINIUM (Larkspur).

Formosum. The old fashioned blue Larkspur. Grows about 3 feet tall with long spikes of most intense dark-blue flowers an inch across, with white centers. Blooms all summer.

DIGITALIS (Foxglove).

Large tubular flowers are thickly clustered on tall spikes and are produced in great profusion; ranging in colors from purple to white, with throats variously spotted and colored. Mixed colors. 3 feet high.

GAILLARDIA (Blanket Flower).

One of the most attractive perennials. Will thrive in almost any position or soil.

One solid mass of bloom from June till autumn. The gorgeous flowers, two or three inches in diameter are borne on stems 18 to 24 inches long. The prevailing colors are bright golden yellow and rich reddish brown, sporting into every imaginable shade and tint; though the majority have reddish chocolate centers, with rings of crimson, maroon, orange or vermillion, and deeply tipped with orange, yellow or lemon. Mixed colors.

GYPSOPHILA.

Paniculata (Baby's Breath). 2 feet. The tiny white flowers are borne in great profusion on such slender stems that they appear as clouds floating in the air. Bloom during July and August.

HIBISCUS (Mallow).

Giant Mallow Marvels. 4 to 6 feet. These are indeed marvels of brilliancy and beauty. Large flowers, six to eight inches in diameter, are produced in great profusion from July till late in the fall. The blossoms are fiery crimson, blood red, pink and white. Mixed colors.

HOLLYHOCK.

Double. 6 to 8 feet. Of tall growth, with beautifully fringed flowers four to five inches across. Two to four buds at the base of each leaf. Long blooming season. In separate colors,—white, scarlet, yellow, maroon, crimson, pink, also mixed.

PAPAVER (Poppy).

Nudicaule (Iceland Poppy). 18 inches. Beautiful white, yellow and orange colored flowers are produced on long stiff stems from June till October. Mixed.

Oriental (Oriental Poppy). 3 feet. Gorgeous flowers of intense crimson, five to seven inches across are freely produced during May and June on tall strong stems. Light green, silvery fern-like foliage.

STOKESIA (Cornflower Aster).

Cyanea. 18 to 24 inches. Blooms from July until late into October. Its beautiful flowers, of a delicate lavender-blue color, are four or five inches in diameter and are highly prized for cutting.

Cyanea Alba. Same as the above, but white.

SWEET WILLIAM

Double Mixed. Large fragrant flowers borne in trusses of great size, during June and July. Valuable for cutting. The leading varieties and colors mixed.

ANNUAL FLOWER PLANTS.

Asters, Antirrhinum (Snapdragon), Calliopsis, Calendula (Scotch Marigold), Poppies, Cosmos, Marigolds, Nasturtiums, Pansies, Petunias, Salvia (Scarlet Sage), Verbenas, Heliotropes, Portulacas, Ten Weeks Stock, Zinnias. All of these flowers are so well known, they need no description, but you can find descriptions of them in any seed catalogue. As stated in price list, in a few cases, plants of separate colors and varieties can be supplied, but most of them can be supplied in mixtures only. Each of these mixtures consist of many different varieties and colors,—the very choicest of each kind of flower.

PRICE LIST

At the prepaid prices given, stock will be shipped prepaid to any part of Me., N. H., Vt., Mass., R. I., Conn., N. Y., N. J., Dela., Md., D. C., Va, and W. Va. It will be shipped at my option, by mail or express, whichever is least expensive, but when requested, I will send small lots by mail. If you want large lots of plants sent by mail or if you live in a state not named above and want your plants sent by mail, you can order at the "Express not prepaid" prices, and I will send them by mail C. O. D. for the amount of postage, and you can thus pay the postage when you receive the plants. If you want plants shipped this way, be sure and state in your order, "By mail C. O. D. for the postage."

THE PRICES QUOTED ARE FOR THE QUANTITIES SPECIFIED, OF A SINGLE VARIETY, BUT SIX OF ANY VARIETY WILL BE SUPPLIED AT THE DOZEN RATE. 50 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 50 RATE; 100 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 100 RATE; 250 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 250 RATE; 500 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 500 RATE; AND 1,000 PLANTS OF MORE THAN ONE VARIETY CANNOT BE SUPPLIED AT THE 1,000 RATE.

I wish to emphasize that I DO NOT GUARANTEE SAFE DELIVERY, and that ALL STOCK IS SHIPPED AT PURCHASERS' RISK. It will be carefully packed and delivered to the carrier in good condition, but after that, it is beyond my control and my responsibility ceases.

BERRY PLANTS.

SHIPPING POINTS: Berry plants will be shipped mostly from Good Ground, N. Y. Some will be shipped from other points in N. Y., N. J., Dela., and Md.
